

Database Monitoring & Management

Oracle® (Windows®)

Sensor List

Cluster Extents

Checks if clusters use more extents than amount allocated.

Control File Location

Checks if more than one control file is on the same device.

Control File Status

Monitors status of all control files for monitored databases.

Corrupt Objects

Checks for corrupt database objects.

Database Block Size

Checks block size for monitored databases.

Database Cache Efficiency

Monitors the database cache efficiency.

Dictionary Cache Efficiency

Monitors dictionary cache hit percentage.

DML Locks

Monitors number of DML locks per concurrent user.

Extent Sizes

Checks extent sizes for efficient block usage.

File Errors

Checks for errors in files used by the monitored databases.

Free List Contention

Monitors percent of transactions waiting for buffer free list.

Index Extents

Monitors the percentage of extents allocated to an index that are currently in use.

Instances Responding

Determines if any of the monitored Oracle database instances are responding.

Latch Contention

Monitors the percentage of transactions required to wait for a latch to complete.

Library Cache

Checks for library cache fragmentation.

Locked Objects

Monitors objects locked for an excessive period of time.

Object Extents

Checks for objects with excessive extents allocated.

Oracle Performance Checks

Checks some basic performance indicators.

Oracle Services

Checks auto-started Oracle services that are not running.

Redo Log Allocation Latch

Monitors hit percentage for redo log allocation latch.

Redo Log Buffer

Checks for transactions waiting for a redo log buffer.

Redo Log Device

Checks if members of the same redo log group are on the same device.

Rollback Segment Exhausted

Checks percent of extents allocated to rollback segment.

Rollback Segment Size

Monitors total extents allocated to a rollback segment.

Sorts In Memory

Monitors percent of sorts done in memory versus on disk.

Table Extents

Monitors percent of allocated extents used by a table.

Tablespace Full

Monitors free space available to a tablespace.

Tablespace Status

Verifies status of all tablespaces on monitored databases (i.e., online or offline).

Users Per Rollback Segment

Checks the ratio of users per rollback segment.
